

André João da Silva Penas

Cybersecurity Analyst | Blue Team | BeCode Cybersecurity Bootcamp 2026

Brussels, Belgium | +32 477885055 | penas.andre@gmail.com | github.com/penasandre

Languages: English (C1) | French (C1) | Dutch (B2) | Portuguese (Native) | Spanish (B2)

Technical Stack: Burp Suite | Wireshark | Wazuh SIEM | Python | Bash

Cybersecurity trainee specialising in Blue Team operations, incident response, threat detection, and defensive tooling. Combines hands-on SOC skills (SIEM, PCAP forensics, HIDS development) with 6 years of Python and data systems experience. Seeking an internship in SOC analysis or defensive security

CYBERSECURITY TRAINING & PROJECTS

02/2026 – Present | **BeCode Cybersecurity Bootcamp**

BeCode – Brussels, Belgium

Intensive hands-on programme; each lab assignment requires producing a structured technical report covering methodology, findings, and remediation

Incident Response

- PCAP analysis in Wireshark (TCP stream following, service identification, CVE correlation) to reconstruct attack timeline and identify IOCs
- SIEM threat hunting via Wazuh dashboard; log analysis (auth.log, syslog)

Tools: Wireshark, Wazuh SIEM, SSH

Linux Privilege Escalation — Incident Response

- Correlated auth.log and audit.log entries to reconstruct full attack chain and identify indicators of compromise
- Identified lateral movement via stolen SSH key, SUID misconfiguration for privilege escalation to root, backdoor account creation, and cron-based persistence

Linux Host Intrusion Detection System

- Modular HIDS in Bash: log-based intrusion detection, SHA256 file integrity monitoring, process/network auditing, user activity tracking
- Severity scoring (INFO/WARNING/CRITICAL) with JSON alert output

Tools: Bash, journalctl, sha256sum, ss, awk

Web Application Penetration Test — OWASP Juice Shop

- Analysed attack surface of a vulnerable web application to understand attacker techniques and identify defensive gaps
- Deliverable: professional report with CVSS v3.1 scores, CWE mapping, root cause analysis, and remediation guidance

Tools: Burp Suite, CyberChef, John the Ripper, Docker

Python Network Reconnaissance Tool

- Ping sweep + TCP port classification (OPEN/CLOSED/FILTERED) with CSV reporting

Tools: Python socket, subprocess, ipaddress

André João da Silva Penas

WORK EXPERIENCE

09/2025 – Present | **Platform Developer & Data Engineer (Independent Project)** euGreenanalytics – Brussels, Belgium

- Built and deployed a public web platform (eugreenanalytics.com) integrating REST APIs, automated data pipelines, and interactive dashboards, managing the full stack from data ingestion to published output
- Developed Python scripts (Pandas, REST APIs) to automate extraction, transformation, and processing of large time-series datasets from public APIs
- Maintained a live data platform combining SQL, Python, and Power BI, demonstrating ability to design and sustain production-grade data infrastructure independently

01/2025 – 08/2025 | **Technical Lead / Python Developer** SWECO – Brussels, Belgium

- Developed a Python-based optimisation algorithm processing real-time and historical market data feeds to simulate and maximise dispatch strategies across multiple market scenarios
- Led technical analysis for industrial clients, structuring complex datasets into evidence-based roadmaps with measurable targets

12/2021 – 01/2025 | **Data Analyst & Python Developer** Becquerel Institute – Brussels, Belgium

- Built Python models to process and analyse multi-year historical datasets, producing forecasts and investment-grade analyses for EU-funded research projects and private clients across European markets
- Delivered regulatory compliance assessments and technical advisory for EU policy development

PUBLICATIONS & RESEARCH

Co-authored 4 publications in EUPVSEC (2022-2024) and Energies/MDPI (2021) - energy systems, PV markets, and stochastic demand modelling

EDUCATION

09/2018 – 03/2019 | **ERASMUS + Programme: Energy Systems**

Aachen University of Applied Sciences – FH Aachen – Aachen, Germany

09/2014 – 12/2019 | **Integrated MSc in Environmental and Energy Engineering**

Faculty of Sciences of the University of Lisbon – Lisbon, Portugal
